

3.16.20

Dear Oklahoma Spine Hospital Patients and Visitors:

Effective 3.17.20, Oklahoma Spine Hospital will implement new screening procedures for COVID – 19 for all Patients and Visitors.

All entrances with the exception of the main front door will be closed.

The ER door will be accessible for emergencies only.

Patients and visitors will be met by an Oklahoma Spine Hospital employee out at the front drive and requested to initially stay in their vehicles and directed to a drive-up screening location.

We are limiting visitors to one per patient during their hospital stay

These procedures will be continuously monitored for effectiveness and efficiency and modified if necessary.

We appreciate your patience and understanding.
